

Terry Roy | Software Developer

terryr518@gmail.com | (845) 671-9161 | Brooklyn, NY 11211

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, Kotlin, SQL, C++, C, Scala, Golang, C#
Technologies: React, Node.js, AWS (DynamoDB, Lambda, Glue, S3, API Gateway), GCP (Firebase, Cloud Storage), IntelliJ, Visual Studio, Cypress UI Testing, Git, Elastic Search

WORK EXPERIENCE

Amazon Software Development Engineer 2 (Java, React) | *Apr 2023 - Sep 2025 | New York, NY*

- **Order Management System (Amazon's managed service ad portal (~\$1B annual revenue))**
 - Mentored intern to successful return offer by modernizing data pipeline to Amazon Data Warehouse, migrating from legacy system and saving 100+ developer hours annually in maintenance.
 - Refactored OMS UI tables using AgGrid for inline editing of ad products, saving customers ~14,000 hours/year; created UI mocks due to limited UX resources.
- **Deal Support in OMS**
 - Enhanced backend architecture to support deal approval, enabling \$10+ million in added revenue.
 - Optimized high-latency APIs identified during on-call rotations by introducing multithreading for concurrent service calls, reducing page load times by 50%+.
- **Campaign Proposal Builder (Replacement for Legacy OMS)**
 - Owned secure Salesforce (CPB) to internal AWS (OMS) backend integration design via IAM-authenticated API Gateway, reducing launch time by 6+ months through a phased legacy migration strategy.
 - Designed an SNS-based notification system that ensured operational continuity, enabling partner teams to maintain millions in revenue without disruption.

Amazon Software Development Engineer 1 (Java, React) | *Sep 2020 - Apr 2023 | New York, NY*

- **Order Management System**
 - Architected new reporting service using AWS CDK, Lambda, and EventBridge, automating daily OMS reports for partner teams; saved the engineering team over 100 hours annually in legacy service maintenance.
 - Automated DynamoDB data exports to Glue database for BI teams, eliminating 100+ hours of manual report building per year.
 - Developed External IO approval UI, enabling customers to approve orders via website instead of email, saving hours per approval.

PROJECTS (theterryroy.com/projects)

Tapework App (Node.js, React Native) | *Sep 2025 - Present | New York, NY*

- Building music discovery and collaboration app with Expo & React Native; implemented in-app audio recording with multi-track layering capabilities.
- Developed real-time social features with Firebase authentication and Firestore, enabling users to discover and share music clips across devices.
- Integrated Cloud Storage for audio file management with secure upload/playback functionality.

Chai App (Node.js, React Native) | *May 2020 - May 2021 | New York, NY*

- Mental health conversation app with 1,000 Google Play installs and 400 iOS installs.

EDUCATION

Northeastern University 2020 | Boston, MA

Khoury College of Computer and Information Science

Bachelor of Science in Computer Science and a minor in Mathematics
