

Terry Roy | Software Developer

terryr518@gmail.com | (845) 671-9161 | Brooklyn, NY 11211

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, Kotlin, SQL

Technologies: React, Node.js, AWS (DynamoDB, Lambda, Glue, S3, API Gateway), GCP (Firebase, Cloud Storage), IntelliJ, Visual Studio, Cypress UI Testing, Git, Elastic Search

WORK EXPERIENCE

Amazon Software Development Engineer 2 Java, React | *Apr 2023 - Sep 2025 | New York, NY*

- Engineered full-stack solutions for Order Management team - web app with React frontend, Java REST API backend.
- Campaign Proposal Builder (New solution to replace OMS)
 - Owned backend integration design: created secure backend system allowing Salesforce (Where CPB is) to call Amazon services (OMS) via IAM-authenticated API Gateway.
 - Designed notification system: updates trigger SNS topics for internal team subscriptions.
- Deal Support in OMS
 - Enhanced backend architecture to support deal approval, enabling \$10+ million in added revenue.
 - Investigated slow apis with new integration during on-call - introduced multithreading for concurrent API calls, reducing page load times by 50%+.
- Order Management System
 - Mentored intern to successful return offer by modernizing data pipeline to Amazon Data Warehouse, migrating from legacy system and saving 100+ developer hours annually in maintenance.
 - Refactored OMS UI tables using AgGrid for inline editing of ad products, saving customers ~14,000 hours/year; created UI mocks due to limited UX resources.

Amazon Software Development Engineer 1 Java, React | *Sep 2020 - Apr 2023 | New York, NY*

- Order Management System
 - Architected new reporting service using AWS CDK, Lambda, and EventBridge, automating daily OMS reports for partner teams; saved the engineering team over 100 hours annually in legacy service maintenance.
 - Automated DynamoDB data exports to Glue database for BI teams, eliminating 100+ hours of manual report building per year.
 - Developed External IO approval UI, enabling customers to approve orders via website instead of email, saving hours per approval.

PROJECTS (theterryroy.com/projects)

Tapework App Node.js, React Native | *Sep 2025 - Present | New York, NY*

- Building music discovery and collaboration app with Expo & React Native; implemented in-app audio recording with multi-track layering capabilities.
- Developed real-time social features with Firebase authentication and Firestore, enabling users to discover and share music clips across devices.
- Integrated Cloud Storage for audio file management with secure upload/playback functionality.

Chai App Node.js, React Native | *May 2020 - May 2021 | New York, NY*

- Mental health conversation app with 1,000 Google Play installs and 400 iOS installs.

EDUCATION

Northeastern University 2020 | *Boston, MA*

Khoury College of Computer and Information Science

Bachelor of Science in Computer Science and a minor in Mathematics
